PROFILE SUMMARY

Results-driven AI Engineer specialized in building scalable SaaS platforms, distributed backend systems and agentic AI solutions. Experienced in designing production-grade multi-tenant architectures, high-throughput messaging engines, and real-time computer vision pipelines using FastAPI, Redis, and advanced LLM orchestration (Langchain).

SKILLS

AI & Machine Learning	OpenAI API, Claude Code, LangChain, LangGraph, MCP Servers, YOLOv8, DeepSORT, PyTorch
Backend & Systems	FastAPI, RESTful APIs, Asynchronous Processing, Redis Queues, PostgreSQL, SQL
Languages	Python, Java (OOP), Linux, C
Tools & Platforms	n8n Automation, Docker, Git, Playwright, Stability AI API, Tavily, Neon DB, Firebase

EXPERIENCE

AI Engineer
Kodryx AI

Oct 2025 – Present
Hyderabad

- **CultureSense – (AI-Driven Employee Intelligence Platform):** Architected an end-to-end NLP pipeline using **LangChain** and **OpenAI** to analyze communication streams (Teams, Slack, Outlook) for organizational health. Engineered modular prompt workflows to extract sentiment and behavioral signals from unstructured conversational data, converting raw logs into structured metrics. Enabled proactive leadership decision-making by surfacing real-time trends in employee engagement and organizational risk indicators.
- **Kodryx Social (Enterprise Messaging SaaS):** Engineered a high-concurrency multi-tenant platform for automated WhatsApp marketing using **FastAPI**. Designed a distributed task architecture using **Redis** to manage bulk campaigns, implementing custom rate-limiting and idempotent retry strategies to ensure message delivery reliability.
- **TANITA (Resilient Workflow Automation):** Developed an automated report distribution engine using **Playwright** to solve last-mile delivery challenges. Designed an intelligent matching algorithm to map dynamic PDF metadata to user profiles with a state-persistent resumable workflow.

Artificial Intelligence Job Simulation Intern
Cognizant (via Forage)

Jun 2024
Remote

- Performed exploratory data analysis using Python and built machine learning models for business insights.

Content Moderator cum Data Research Analyst
Concentrix (Avalon Project) via Ixora Global Services

Nov 2024 – Dec 2024
Hyderabad

- Managed high-volume multimedia data annotation and classification for large-scale ML model training, maintaining 99% data integrity.

PROJECTS

- **AI News Summarizer (Agentic Research Workflow):** Developed a stateful AI agent using **LangGraph** to automate multi-step news aggregation and synthesis. Integrated **Tavily API** for real-time web research and implemented a cyclical logic for source verification and conflict resolution. Built a responsive **Streamlit** dashboard to deliver tailored, executive-style summaries from unstructured global news feeds.

- **Autonomous LinkedIn Content Engine (n8n):** Designed a multi-node automated workflow in **n8n** for organization-level social media publishing. Integrated **Tavily API** for real-time AI research and **Stability AI** for multi-modal asset generation. Developed custom **JavaScript** nodes for JSON sanitization and regex-based headline cleaning.
- **CCTV AI Guard (Agentic Autonomous Surveillance):** Architected an end-to-end vision pipeline utilizing **YOLOv8** for real-time human detection and **DeepSORT** for persistent multi-object tracking. Integrated **GPT-4o-mini** to perform behavioral reasoning on tracking telemetry, enabling autonomous risk assessment and automated SMTP alerts with snapshots.
- **Phishing URL Detection System:** Developed an ML-based security tool achieving 96.9% accuracy using advanced feature engineering and ensemble classification techniques.

EDUCATION

B.Tech in Computer Science and Engineering (AI & ML)	Jul 2025
Joginpally B R Engineering College, Hyderabad	CGPA: 7.89
Intermediate (MPC)	2020
Toppers Junior College, Hyderabad	Percentage: 93.6%
Xth Standard	2019
St. Martin’s High School, Hyderabad	Percentage: 83.3%

PUBLICATIONS & ACHIEVEMENTS

- **Research Publication:** "Fake Review Detection using Hybrid Deep Learning" (CNN + LSTM + Fuzzy Logic) published in the *European Advanced Journal*.
- **AI & Cloud Certifications:**
 - *Claude Code in Action* (Anthropic)
 - *Computer Vision with Azure Cognitive Services* (Microsoft)
 - *Deep Learning with PyTorch*
 - *IBM Watson Business Assistant*
 - *Lead Generation Chatbot with Chatfuel* (Coursera)
 - *Introduction to AI* (Great Learning)
